

Media Kit 2026

Independent financial product research and comparison platform, serving high-intent readers across four English-speaking markets.

CONFIDENTIAL PARTNER BRIEFING

US · UK · CANADA · AUSTRALIA

EXECUTIVE SUMMARY

About SmartFinPro

SmartFinPro is an independent, expert-led research and comparison platform for financial products and services, built for readers who are actively evaluating options before they commit.

Founded in 2024 and operated by SmartFinPro LLC (Wyoming, USA), the platform publishes in-depth, editorially independent coverage across trading platforms, business banking, robo-advisors and wealth management, forex brokers, cybersecurity tools for professionals, AI productivity tools, credit and personal finance products, and precious metals investing — localised for the United States, United Kingdom, Canada, and Australia.

Built For

- Individual investors and traders comparing platforms before opening an account
- Small business owners evaluating banking, payments, and finance tooling
- Finance professionals and consultants researching vendor and software options
- Readers arriving via specific, comparison-oriented search queries — not casual browsing

Why Partners Engage With SmartFinPro

- ✓ Four-market reach — US, UK, Canada, and Australia — from a single integration
- ✓ Structured comparison placement inside a genuine decision tool, not a rotating banner
- ✓ A compliance-first editorial model with regional regulatory disclosure built in
- ✓ Attribution-gated tracking infrastructure designed for verified, accountable partnerships

This document outlines SmartFinPro's platform, audience, and the Comparison Cockpit — our structured comparison infrastructure — along with how prospective partners can engage.

AUDIENCE & MARKET POSITION

Who SmartFinPro Reaches

SmartFinPro readers arrive with intent — searching for specific comparisons ("best business bank account for startups," "eToro vs. Interactive Brokers," "best robo-advisor for retirement") rather than browsing generally.

Four-Market Coverage

MARKET	REGULATORY CONTEXT	REPRESENTATIVE CATEGORIES
United States	—	Trading, AI Tools, Personal Finance, Business Banking, Gold Investing
United Kingdom	FCA	Trading, Cybersecurity, Business Banking, Personal Finance
Australia	ASIC	Forex, Cybersecurity, Business Banking, Superannuation
Canada	CIRO	Trading, Forex, Personal Finance

Reader Intent

Content is structured around bottom-of-funnel research: side-by-side comparisons, "best of" category pages, and in-depth single-product reviews. Readers are typically comparing a shortlist of two to four providers before making a decision.

Detailed traffic and engagement analytics are available to prospective partners on request, verified directly against SmartFinPro's analytics dashboard rather than quoted from a static document.

PLATFORM INFRASTRUCTURE

The Comparison Cockpit

A structured decision layer for high-intent categories — not a static roundup article, but a server-rendered comparison engine built for the moment a reader is choosing between providers.

The Comparison Cockpit powers SmartFinPro's "Best X" pages: interactive, SEO- and AEO-optimised comparison surfaces for categories such as robo-advisors, business bank accounts, and trading platforms. Each page is server-rendered for speed and crawlability, and structured for both traditional search and answer engines.

Core Capabilities

- ✓ Sortable comparison matrix across fees, features, and ratings

✓ Live cost projection per product

✓ Side-by-side product comparison
- ✓ Guided "Find My Match" filtering

✓ Attribution-gated CTAs, verified before activation

✓ Full JSON-LD structured data for search & AI visibility

Live Examples

CATEGORY	LIVE PAGE
Robo-Advisors (US)	smartfinpro.com/us/personal-finance/best/robo-advisors
Business Bank Accounts (US)	smartfinpro.com/us/business-banking/best/business-bank-accounts

For partners, this means placement inside a genuine research and decision tool at the exact moment a reader is comparing options — not a banner competing for attention alongside unrelated content.

CONTENT & DISTRIBUTION

Content & Distribution Assets

Every review is produced under a documented editorial methodology, independent of commercial relationships, and structured for discovery across both search engines and AI answer engines.

100+ EXPERT-REVIEWED PRODUCTS	200+ INDEXED CONTENT PAGES	16 PRODUCT CATEGORIES	4 MARKETS
---	--	---	---------------------------------

Content Formats

- Long-form, single-product expert reviews with pros/cons and verdict
- Comparison Cockpit "Best X" category pages
- Interactive financial calculators and comparison tools
- Editorial methodology, expert verification, and correction policy pages

SEO & AEO Structure

Pages carry Review, FAQ, and structured product schema (JSON-LD), a public methodology and editorial policy, and per-market hreflang. SmartFinPro also publishes an `llms.txt` file, explicitly signalling content availability to AI crawlers and answer engines.

SCHEMA.ORG / JSON-LD	HREFLANG (4 MARKETS)	LLMS.TXT	E-E-A-T EDITORIAL PROCESS
----------------------	----------------------	----------	---------------------------

PARTNERSHIP

Partner Opportunities

Placement options are structured around genuine editorial and comparison surfaces — never pay-to-rank.

Verified Offer Placement

Primary CTA slot within a relevant Comparison Cockpit page. Activates only once a partner's tracking integration (network or direct) has been verified — there is no monetised CTA prior to verification.

Review Placement

A dedicated, in-depth expert review of the partner's product, produced under SmartFinPro's standard editorial and disclosure process.

Comparison Table Inclusion

A row within a "Best X" comparison matrix, evaluated against competitors on the same documented criteria as every other listed product.

Content & Editorial Collaboration

Considered on a case-by-case basis, always subject to SmartFinPro's independent editorial standards.

Newsletter and additional distribution placements are evaluated case-by-case as those channels scale.

GOVERNANCE

Compliance & Editorial Standards

SmartFinPro's commercial model depends on maintaining reader trust — compliance and editorial independence are treated as infrastructure, not afterthoughts.

- ✓ **Independent methodology.** Reviews are researched and written independent of commercial arrangements; no partnership influences a rating or ranking.
- ✓ **Mandatory affiliate disclosure** on every page carrying a monetised link.
- ✓ **Regional regulatory disclosure** — FCA (UK), ASIC (AU), and CIRO (CA) context surfaced on relevant pages.
- ✓ **No pay-to-rank.** Table position reflects documented, published criteria — not commercial tier.
- ✓ **Dated product data.** Fees, rates, and terms are sourced and timestamped, refreshed on a defined cadence.
- ✓ **Attribution transparency.** Monetised CTAs route through a trackable redirect; SubID passback is available once a partner's integration is verified.

Compliance review is a prerequisite for activation, not a step taken after launch.

PROGRAM FIT

Priority Partner Categories

SmartFinPro is actively building out Comparison Cockpit coverage across the following categories. Programs with clean tracking integrations — network or direct S2S/postback — are prioritised for placement.

- Business Banking — accounts, cards, treasury tools for SMBs
- Robo-Advisors & Wealth Management
- Trading & Forex Platforms
- Credit Monitoring & Credit Repair
- Cybersecurity for SMBs — VPN, identity, endpoint security
- AI Tools for Finance & Productivity
- Gold & Precious Metals / Savings Products

SmartFinPro deliberately limits the number of partners onboarded per category to keep comparison pages useful and uncluttered for readers.

NEXT STEPS

Get In Touch

If your program fits one of SmartFinPro's priority categories, we'd like to talk.

Before a Monetised CTA Goes Live

- ✓ Verified tracking integration — network-based or direct S2S/postback
- ✓ Current, accurate product terms supplied by the partner
- ✓ Compliance review sign-off
